Commercial Advertiser.

Rural Sketches Of the Bawaiian Islands. EAST MAUL.

ULUPALAKUA, E. M., May 28d, 1862. It is some time since I attempted to write you; in fact, my absence from " the corner" has been now of so long duration, I have, in a measure, forgotten the art of twaddle; but having read of late some of the ministerial reports, with the accompanying documents " from A to Z, both inclusive," I do not despair of making something out of the few notes I have, if such tremendous state documents can be eliminated from the scanty material in possession of the Minister of " Farrin" Affairs. En avant.

Appearance of the Sugar Plantations. I have recently returned from a visit to Waikapu, Wailuku, and Makawao, and am happy to write the the cane looks flourishing, and the coming crops, 1. not damaged by drought, will be largely in excess of those of former year. A windmill for raising water from the gulch near the East Maui and Brewer Plantations, Makawao, has been erected, and is, I hear, in the full tide of successful operation. Louzadasville.

The busiest spot I met with in my trip was at Waikapu, where my friend, Mr. James Louzada, was erecting buildings, &c., for a sugar mill. Activity and bustle reigned, giving evidence of a vitality brought into existence by the energy and go aheadi. tiveness of one man. Here were a store, blacksmith and carpenter's shops, all in full blast. Three other buildings were in course of erection, and would soon be finished. A commencement had been made to remove the dirt in order to lay the foundation of the sugar and boiling house, which are to be built of stone and of the dimensions of 105 feet by 35 feet. The mill and trash houses will follow suit. Six months in the year the mill will be run by water power, during the remainder the motive power will be mule. The iron-work for the machinery is to be constructed by Mr. T. Hughes of Honolulu, and Mr. L. expects to commence making sugar about the 1st of December next. The beneficial result of this employment of capital in a village like Waikapu, is obtain water to irrigate it, and in whatever direction you looked, you could see the plow and harrow at work. At the end of the year, there will be 250 to 300 acres of cane planted. Success, then, to the proprietor of Louzadasville; and if he who causes two blades of grass to grow, where only one grew before, is to be held as a benefactor to his country, let the young arithmeticians at Punahou solve the problem, how high in the public estimation he should be held, who makes 300 acres of cane vield tribute to the material resources of the kingdom, where

Some ten months ago I chronicled to fame, that single acre of land on the Makee Plantation, situated in a most faverable position, had yielded 54 tons of sugar to the acre. There was considerable elongation of the angles of the mouth, with some, at this statement, but as the gentlemanly proprietor of the plantation had the sugar at the time stowed away in his godowns, and his no less gentlemanly clerk, (if you do not say a good word for yourself now-a-days, no one else will,) has since had the satisfaction of posting the account of sales of the same, why let 'em elongate, and swallow this. Mark Previer at Waikapu had standing, when I had the pleasure of seeing it four weeks ago, before his house, three-fifths of an nere of cane. Since, then, it has been sold, taken to Makawao, and put through the mill of the Brewer Pleatetion, yielding over 7,800 ths. of sugar. The whole area only measured three-fifths of an acre, and my informant tells me, that the 7,800 fbs. of sugar was the product of about half an acre only. If this don't "beat Bannagher," what does? Equal to six and a half tons of sugar to the acre! Golf mit uns, as the motto reads on the Prussian Consul's sign, in Honolulu, which Aleck C. always translates Got mittens. Why don't the shopkeepers in Honolulu, whom His Excellency the Minister of Finance is after with a sharp stick, sell out, leave, get up and git, and invest in Waikapu sugar lands? "I pause (paws is intended to be a goak for Aleck's mittens,) for a reply."

before but a few acres were cultivated, or just enough

to show that it was in the nature of the soil to pro-

Yield of Sugar to the Acre at Walkapu.

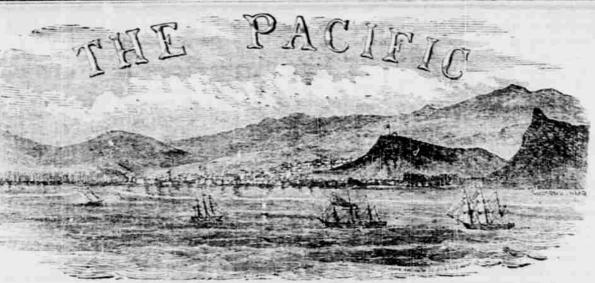

A year at Waikapu matures the cane for the mill, while it requires double that time on the hills of Ulupalakua and Makawao. As water is needed for irrigating the plains, they are digging a well on the flat in Waikapu, twelve feet in diameter. It is estimated that a depth of 90 to 100 feet will have to be reached before water can be obtained. If government had any money, the Legislature could do nothing better than to make an appropriation to assist so worthy an undertaking, or let the Executive appropriate it anyhow, charge it against the "Milinetary" Fund, and de away with a few one-fortieths of a soldier to each inhabitant of the group.

Sugar Items from Manila. Under date of Manila, 1st of February, current, I have read a letter from a gentleman who visited these islands in August last, and took great interest in our sugar plantations. As the following may be of interest to many here, I quote for their benefit : "On the 6th of January, I started on a trip into the interior. During the seventeen days I was absent, I made nearly the entire circuit of the Luguna de Taal, and also of bay, visiting the volcano, and the city of Batanzas, which was our southernmost point. I saw a good deal of sugar-making while absent, and picked up some items which may perhaps interest you. The quality of sugar generally produced in these islands, is suitable only for refining, and is shipped largely to California, Australia, Europe and America for that purpose. As now made by the natives, it would be difficult to improve the quality, as all their appliances are of the rudest possible descrip-tion. Their rollers are always perpendicular, and usually wood, although I saw some that were made of blue granite. Buffaloes furnish the motive power in all instances. I saw an English gentleman, Mr. Scott, at Caluan, who has the only steam engine for ar-making in these parts, the only one I between your islands and Ceylon, and he now regrets having incurred the expense of it, as his sugar is 50 cents per pecul better than the common sort, and slow of sale, while the staple article is always in demand for cash. In one word, there is no market here for the intermediate grade which you make, and the Refinery in this city has not proved a profitable concern, although furnished with the best of French machinery. The best class of consumers in the interior, purify the local made sugar with whites of eggs, into caramelo, and prefer it to the refined article made here, so that the consumption of real lost sugar is confined to this city. Mr. Scott grinds with three rollers 5 feet long, 27 inches in diameter, pumps directly into his cariffers, which are heated to 2120 by exhaust steam, has two batteries of 5 kettles each, cools in cance shaped, wooden vessels, and drains for six weeks in vats like a V made of mats and bamboo,

each holding about two tons; cane generally small, very short joints, a yellow variety peculiar to these islands; white and red kinds do about as well; grind

once planting; stripping the dead leaves, is unknown

PUBLISHED WEEKLY BY HENRY M. WHITNEY.

Sugar at Hana. Mr. Needham informs me he has 50 acres planted and up, at his new plantation in Hana, and expects to be at work grinding about the 1st of December.

Rice at Walluku. Notwithstanding the hard luck of Lawyer Havekost in rice growing last season, owing to the prevalence of the Konas about the time of harvesting, he Late Surgeon United States Navy, late Consular Physician to is at it again, and with Rev. Mr. Alexander, has office corner Kashumanu and Merchant streets, and residence at Dr. Wood's Mansion, Hotel street.

Medical and Sargical advice in English, French, Spanish, and appointment as Registrar of Conveyances, and trust it will not interfere through the laborious duties attendant upon that office, with the lively interest which that gentleman has always taken in agricultural enterprises in this district.

Wailuku Plour Mill. The Flour Mill at Wailuku, lately run by the Hon. member from that place, W. H. Kaauwai, Esq., has changed hands. I understand the purchaser is a Honolulu merchant. It is now being repaired, and a new run of stone put up. The latter was lately imported from San Francisco by the Yankee. A practical miller from California is superintending the work, and no doubt East Mani will soon turn out as fine flour as Honolulu.

Sugar Mill at Wailuku. There is an " on dit" floating about that a sugar mill is to be crected. This is a desideratum much wished for by the inhabitants. This would no doubt BOOT and be accomplished, could sufficient land be obtained at a reasonable figure to justify a capitalist to embark in the enterprise, so as to be independent of the whims of the "free and enlightened citizens," who in their willingness to work are a good deal like women, of whom, according to Hudibras,

When they will, they will, there's no denying on't, When they won't, they won't, and there's an end on't. If Hudibras did not say so, I forgive him, and always think he had ought to.

H. S. N. Co., "Kilauca." This fine boat again rejoices our eyes with her regular appearance. For three or four weeks, I mentally declaimed Banished from Rome, as they one by one rolled by, and gave no token of her arri-One of the wealthiest merchants of Kalepolepo and the writer, had two or three serious conversations about paying up her liabilities, or buying. if we could get the stock at twenty-five cents on the Cabinet Maker and French Polisher, Hotel Street, opposite to Government House. 267-1y dollar, and not allowing her to be sold for China. are planting every piece of land, where they can But I see the Government and Mr. Green have anticipated us, although they have paid, rumor says, a higher figure, say forty cents. I am glad they have, for as usual, I went into the thing impulsively, and found on my return home. I had been too brash in my intentions, for, on taking account of cash on hand, I discovered I had just money enough left to pay for a present I had ordered for a

"Makien scarce six-toen years old.
With a very large fortu ine of silver and gold." Having nary a dime, I am therefore in precisely the right situation to offer a sound opinion, in the words of Jack Bunsby, "an opinion as is an opinion " Government ought to keep this boat going, even at a little temporary loss on the investment. It JOHN RITSON is hard to have to say that the Hawaiian Islands cannot support one steamer, but such would appear to be the case. This is the more to be regretted, just as the islands are on the point of being made the intermediate stopping place between San Francisco and China for the new line of steamers. The opposi- Proprietors .- G. P. JUDD, S. SAVIDGE, and C. H. LEWERS tion between the schooners and steamer, if it has had the effect to induce a more economical expenditure, will have indirectly performed a great good. More anon, paha.
